Summary

As a seasoned frontend developer, I possess 5 years of extensive experience working on diverse projects, ranging from small-scale to enterprise-level, in team environments. My unwavering passion for frontend development fuels my continual pursuit of knowledge and growth in this dynamic field. Presently, I am dedicated to elevating my proficiency in the ReactJS library, while sharpening my expertise in TypeScript and Redux. With an unwavering commitment to refining my skillset, I am eager to collaborate with like-minded professionals in the industry to deliver exceptional frontend experiences. I invite you to connect with me to explore possibilities for mutual growth and exceptional results.

Experience

Frontend Developer

PHILIPP PLEIN

Feb 2022 - Present (1 year 2 months)

My responsibilities as Frontend developer included:

- Maintaining existing websites (HTML, CSS, JS)
- Developing new websites and pages (Adaptive cross-browser layout using BEM methodology.)
- Developing new website functionality such as media widgets, visual product displays, etc. (JS, PHP)
- Working with APIs for platforms such as Facebook, Instagram, YouTube, etc. (Collecting data from company accounts for dynamic display on websites.)
- Managing the administrative panel of Salesforce (Creating new assets, slots, promotions, redirect rules etc)
- Working with the backend part of Salesforce (PHP, JS) (creating new slots, fix some site bugs)
- Working with Emarsys (Developed and customized user feedback forms, successfully integrated them into websites, and effectively collected valuable information from users.)
- Working with Wordpress (Development of a corporate website for a company with a unique design without using default WordPress templates, and implementation of the ability to edit the website only through the administrative panel without losing the quality of displaying website elements on all devices.)
- Optimizing website loading speed and performance
- Introduction of FE features to make CX more interesting and discoverable

Frontend Developer

Traffic Market

Feb 2021 - Aug 2021 (7 months)

During my time at Traffic Market as a Frontend Developer, I was responsible for:

- Developing single-page and multi-page websites, including creating new pages and maintaining existing ones (using HTML, CSS, JS)
- Conducting SEO optimization to improve website visibility and performance on search engines

- Optimizing website loading speed and performance by using techniques such as image compression and code optimization
- Implementing redirects to improve user experience and site navigation
- Creating interactive elements such as calculators, sliders, and modal windows (using JS)
- Skilled in using Photoshop, Figma, and Zeplin for design and collaboration with the team
- Familiar with Perfect Pixel and BEM methodologies for ensuring accurate and consistent design implementation across all devices and platforms
- Designing and coding email messages, including creating forms for data collection and integration with website databases.

Frontend Developer

Synergy global cooperation

Apr 2020 - Jun 2020 (3 months)

- Development of a Single Page Application (SPA) with a unique design and complex graphic solutions
- All website code is responsive and cross-browser compatible
- Implementation of SPA using ReactJS
- Development of multiple language versions of the website
- Working under tight deadlines with the shortest possible deadline, where it was important to implement the most correct and working code.

Software Engineer

TravelLine

Aug 2019 - Apr 2020 (9 months)

- Designed and developed visually appealing and user-friendly websites with unique designs and complex graphics using various front-end technologies such as HTML, CSS, JavaScript, and ReactJS.
- Ensured cross-browser compatibility and responsiveness of all websites and applications, delivering seamless experiences across all devices and platforms.
- Collaborated with cross-functional teams to develop and implement new features and improvements using project management tools like JIRA.
- Optimized website performance and speed through the development of innovative front-end solutions, resulting in increased traffic and improved user engagement.
- Developed custom Bitrix components and modules to enhance the functionality and performance of company websites.
- Provided ongoing support and maintenance of existing Bitrix-based websites, ensuring their stability, security, and compliance with best practices.
- Conducted thorough testing and debugging of all front-end code to ensure maximum efficiency and quality.
- Stayed up-to-date with the latest front-end development trends, technologies, and best practices, constantly seeking to improve and innovate.

Frontend Developer

truebee.ru

Sep 2018 - Nov 2018 (3 months)

- I developed the truebee.ru website: I was responsible for creating the website.
- By creating HTML page layouts based on Figma designs: I used Figma designs as a reference to create • HTML page layouts. Figma is a design tool used for creating user interfaces, web pages, and other digital products.

- Which were later implemented on LARAVEL: After creating the HTML page layouts, they were implemented on the Laravel framework. Laravel is a popular PHP framework used for web development.
- Additionally, I maintained the project in Git: I used Git, a version control system, to keep track of the project and its changes. This allowed me to collaborate with other developers and ensure the project was always up-to-date.
- While collaborating with other developers: I worked with other developers on the project, which required coordination and communication to ensure everyone was on the same page.

Frontend Developer

Innova group

Mar 2018 - Jul 2018 (5 months)

- Building websites based on pre-existing designs
- Integrating PHP code into pages for statistical tracking
- Implementing page and website layouts based on designs created in Figma or Photoshop, as well as utilizing layouts from pre-existing websites
- Collaborating with existing code bases

HTML Developer

Web Hype

May 2016 - Feb 2018 (1 year 10 months)

- Creating layouts for both one-page and multi-page websites
- Making final touches to layouts in design software such as Photoshop, Figma, and Zeplin
- Communicating with clients to ensure that their requirements and preferences are met, which may include:
 - Gathering requirements and preferences from clients
 - Providing updates and progress reports to clients
 - Receiving feedback and making changes as needed to ensure client satisfaction

Education

Kazan State University

Bachelor, Software engineering

Sep 2015 - Jun 2019

Bauman Lyceum

Upper secondary education, Physics Mathematics

Sep 2004 - May 2015

Skills

Salesforce • BEM • TypeScript • jQuery • Git • Zeplin • Figma (Software) • Adobe Photoshop • Redux.js • React.js
